

## OUR COMPANY

LEES+Associates is a landscape planning and design firm specializing in cemeteries and memorials. Our firm provides a broad spectrum of services based on the principle of supporting healthy, sustainable communities. We have expertise in virtually every aspect of cemetery planning, design, operations and management. We offer services in policy and bylaw development, heritage planning, operational audits, feasibility studies and public engagement. We are proficient at capacity analysis, business planning and perpetual care fund management. Our firm has conducted environmental reviews, researched trends in disposition and implemented innovative practices such as green burial. We have conducted demographic and cultural studies that have led to the site-specific design and construction of successful new cemetery environments.

## CEMETERY PLANNING+DESIGN

Our planning and design expertise is founded on our thorough, first-hand understanding of cemetery operations and management as they relate to the project site and its context. We are increasingly recognized for developing innovative designs for memorial and commemorative sites at a range of scales. Our completed memorial projects, installed at public sites as well as cemeteries, have been well received by our clients and acclaimed by government, family members, community groups, and the public at-large.

LEES+Associates provides assistance to clients at all stages of planning and design. Our firm undertakes design work ranging from small renovations to large scale master plans. Our work responds to the latest trends and developments in commemoration practices, including green burial. Through collaboration with our clients, architects, engineers and related professionals, we are able to meet the needs of all our cemetery and memorial clients.
