Summary

Consulting Engineers of Alberta (CEA) is a registered organization representing Alberta engineering firms, and is dedicated to improving the business environment for consulting engineering firms and providing the highest standards of engineering design and safety. Since 1986, CEA has recognized excellence in consulting engineering in Alberta and throughout the world at the CEA Showcase Awards.

Al-Terra Engineering Ltd. was retained by Strathcona County to provide the design and construction management for the Snow Melt Facility which was built near Ardrossan. Teamwork, collaboration and communication between the design team, contractors and the County were essential to delivering this project on time and on budget.

Strathcona County, with Al-Terra Engineering Ltd., was given the Award of Merit for "Small Firm – Big Impact" for the Snow Melt Facility in 2018. The project could not have been completed without the dedication of County staff at all levels, and the support of Council.
