Dear Sir or Madam:

RE: Letter of Support for Heartland Petrochemical Complex

As the Mayor of Strathcona County, I am writing this letter of support for Inter Pipeline's Heartland Petrochemical Complex to be located within Alberta's Industrial Heartland in Strathcona County. This project meets the economic objectives and the strategic goals of the County which focuses on eight key County-wide priorities:

1. Build strong communities to support diverse needs of residents.
2. Manage, invest and plan for sustainable municipal infrastructure.
3. Cultivate economic diversification, within the petro-chemical industry and beyond, through a business friendly environment.
4. Ensure effective stewardship of water, land, air and energy resources.
5. Foster collaboration through regional, community and governmental resources.
6. Provide facilities and services that are available and accessible to residents.
7. Provide opportunities for public engagement and communication.
8. Foster an environment for safe communities.

With this project we will increase our percentage of total tax base from the petrochemical industry and see growth in the number of full time and construction jobs. We support the proposed complex as a step in the right direction to continue diversifying the local economy and providing added value to Alberta's natural resources. In our meetings with Inter Pipeline, we find that their values match ours of: Integrity, Respect, Safety, Fairness and Cooperation.

We are committed to work with Inter Pipeline through their permitting, consultative, and regulatory process.

Sincerely,

Mayor Rod Frank
Strathcona County
