Subject: Proposed disposal of municipal reserve land – PT. Plan 1220578, Block 1, Lot 1MR – SW 4-52-22-W4

To Strathcona County Council, c/o Paula Laplante – Manager, Land Management Services

Please accept this input as my support for the plan to remove this reserve. The County is ideally situated to enable the development of the Archery Centre of Excellence (ACE). This one-of-a-kind Canadian facility will benefit County residents and the development of recreational and competitive archers, coaches, judges and event officials at the regional, provincial and national level for years to come. In addition to its many benefits to archery in Canada, the creation of the ACE will also produce a wide range of additional economic benefits for the County as a result of the many opportunities it will create to bring visitors to the County who will stay in various hotels and alternate accommodations as well as spending money on food, gas, and other goods and services while they stay here to participate in or watch provincial, national and international level tournaments and training or development sessions each year.

Thank you for your time

Sincerely

Richard Reid

Our family spend a lot of time out at the indoor and outdoor range shooting and using the 3D range, its great to get the kids into a sport that they can be outside enjoying the range as a family affair, opening a new indoor range would be very beneficial to the community and to the members that enjoy this sport.

thanks

Scott Rogers

Subject: Proposed disposal of municipal reserve land – PT. Plan 1220578, Block 1, Lot 1MR – SW 4-52-22-W4

To Strathcona County Council, c/o Paula Laplante – Manager, Land Management Services

Please accept this input as my support for the plan to remove this reserve. The County is ideally situated to enable the development of the Archery Centre of Excellence (ACE).

This one-of-a-kind Canadian facility will benefit County residents and the development of recreational and competitive archers, coaches, judges and event officials at the regional, provincial and national level for years to come. In addition to its many benefits to archery in Canada, the creation of the ACE will also produce a wide range of additional economic benefits for the County as a result of the many opportunities it will create to bring visitors to the County who will stay in various hotels and alternate accommodations as well as spending money on food, gas, and other goods and services while they stay here to participate in or watch provincial, national and international level tournaments and training or development sessions each year.

Sincerely,

Adam Rutsch

Please accept this email as my support for the plan to remove this reserve.

I have been a member of the Sherwood Park Archery Club for over a decade now and I contribute a large portion of my growth, both as an archer and as a person, to our organization.

I first joined the club as a member of the juniors program, at the age of eight, back in 2009. Throughout my years as a junior archer, I was provided many opportunities to develop my skills while also having fun. I attended “fun shoots” that were hosted by our club where I was able to compete and win prizes, I got to shoot both indoors and outdoors throughout the year, I attended competitions where I would compete against other archers, and I made lots of friends that I still see today.

After I completed the juniors program, I was approached by our president Doug Bowes who asked me become a coach and help teach the juniors. He offered to fund my training, along with the training of all other volunteers. I enthusiastically accepted his offer and soon I should be a nationally certified archery coach. As a coach, I have been given the opportunity to assist our young archers develop into exceptional athletes and it has been a very fulfilling experience. I have also been presented with the opportunity to coach private lessons for Fultonvale Elementary Junior High, and some youth groups, and get compensated for my time.

I also gained valuable experience when I joined the club’s executive team during my days in high school. Since I joined the executive, I have participated in deciding future of the club and organizing events such as the Alberta Summer Classic. One really great decision I got to be apart of was deciding who the club would contract to build our targets for the first Alberta Summer Classic. I remember proposing to the executive that we get Bev Facey Community High to construct our targets. My proposal was a success and it instilled a new confidence in my leadership capabilities that I still hold with me to this day.

By supporting the club in developing the Archery Center of Excellence (ACE), more juniors will be able to grow and gain valuable experiences as I have. From my understanding, this will be the only facility of its kind in Canada. It will allow for our club to host more training sessions for developing

archers, coaches, and judges, it will provide an ideal space for recreational archers to practice, and it would allow us to host events from municipal to international levels. This is an amazing opportunity for the Sherwood Park Archery Club, for our County, and for archers all throughout the world.

Sincerely,

Dillon Broman

Archery is a unique skill that is important for me and my family for several reasons:

- Capability of advancement is not dependent on cost. Compared to other Olympic-capable sports it has a very low cost to start the sport, which makes it appealing to many. With the loss in jobs in my industry we have had to cut back on extracurricular activities but this is one that we can maintain.

Archery training is a pre-request to bow hunting. Knowing where

your food comes from, respecting how it got there, how to butcher
and know your meat cuts, has been lost on urban generations.
Sincerely,

| Eliza Fawcett

PT.plan 1220578, block 1, lot 1MR- SW 4-52-22-w4

My name is Quinn Brodie, I am a standing member of the Sherwood Park Archery Club. I attend the Saturday morning advanced archery classes. I have been with and volunteered for the club for more than four years, through which I have learned the in's and out's of the club. I believe, from the experience that I have had with the archery club and many other clubs, that this proposal is one of a kind which will benefit both parties. For one, the archery center of excellence will become the largest archery center in Alberta, much less Canada, and will attract attention internationally. This will bring both people and money flowing into Strathcona County. The center itself will become the new standard in archery around Canada. Shoots will be held, olympic competitors will have a place to practice, money will be made, diversity will be achieved, and most of all, everyone will be happy.

In regards to the sport, new kinds of shooters will flock to the center. Creating new opportunities for skill and teaching practices. Young shooters at the center will have a comfortable place to practice and expand on their previous knowledge of the sport. This will most definitely cause the sport to flourish. With that inflow of new people to the sport more money will be spent, which goes towards taxes, spreading the wealth through the community.

This sport is a community activity and we want to expand it, and have the community grow with us. Thank you for reading my letter, I hope that you consider my opinion, and that you make the best decision our county.

Sincerely,

Quinn Brodie

I would like to add as well that my daughter has been involved with Sherwood Park Archery for the past 3 years and has indicated she will be continuing on and would like to start competing. The development of ACE will allow her to not only build up her archery skills it will give her more opportunities to start competing.

Thank you for your consideration.

To Strathcona County Council:

c/o Paula Laplante - Manager, Land Management Services

Please accept this note as my support for the plan to remove this property from reserve classification. The County is ideally situated to enable the development of the Archery Centre of Excellence (ACE). The construction of this state of the art facility will benefit County residents in the development and training of recreational and competitive archers, coaches, judges, and event officials at the regional, provincial and national levels for many years to come. In addition, the creation of the ACE will also produce a wide range of economic benefits for the County as a result of the many opportunities it will create when visitors will need to use various County based businesses such as hotels, accomodations, meals/food, fuel and other goods and services while they stay here to participate in or watch regional, provincial, national, and international level tournaments, or attending training and development sessions each year.

Trusting that this matter will be decided in our favour.

Regards

Rod Nakamura P.Eng.

Hello Paula,

I am writing to you today to express my opinion about the Sherwood Park Archery Club land. I have been competing in archery and other shooting sports for 15 years and have visited many archery facilities. The Sherwood Park Archery Club is one of the best I have ever visited.

I think it is an excellent idea for the land to be given to the club to further develop into a world class archery facility. Western Canada lacks such a facility and the Sherwood Park Archery Club is ideally located for hosting large, even international archery events. The land is ideal for every different discipline of archery which is something other clubs struggle to deliver.

As a resident of Sherwood Park I think it will be of economic benefit to help develop such a facility.

Sincerely,
Tristan Lebel

Hi Paula. Please accept this input as my support for the plan to remove this reserve.

As a leader of a local youth group based out of nearby Ardrossan, additional facilities that promote youth to participate in healthy, fun skills/activities such as Archery are highly encouraged. Currently, we have use of an indoor archery facility in the west end of Edmonton at a very reasonable fee, but this may be changing soon. So I would like to pledge my support of this initiative as I think we would support it more with our change in situation and its closer location.

Thanks!

Terry Morrow
Ardrossan, AB

Subject: Sherwood Park Archery Club, Proposed Disposal Support Letter

To Strathcona County Council, c/o Paula Laplante – Manager, Land Management Services

The British Columbia Burnaby Archers club welcomes and strongly supports the initiative to develop an Archery Center of Excellence at Sherwood Park, AB. This initiative will provide a broad range of opportunities for developing Canadian archers and an year-round facility to host national and international indoor/outdoor competitions. The County residents will also benefit greatly by having an year-round facility to host archery events that will strengthen local community. In addition, this initiative will bring considerable economic benefits for the County as a result of bringing visitors to the County, all archery events participants will increase the County's economic growth by using hotels and other various accommodations and spending money on gas, goods and services while participating to provincial, national and international tournaments and training sessions all year round.

Please accept this input as our Burnaby Archers club support to enable this development in Strathcona County.

Sincerely,

Paul Mackwood

Burnaby Archers President

Att: Paula Laplante, Manager – Land Management Services

The Lloydminster & Area Archers Association are offering this letter of support for the Sherwood Park Archery Club, in their bid, for a state of the art building to house the sport of archery. Our club along, with the Lloydminster & District Fish & Game Assoc., took on a similar, but smaller scale building in 2008. It has an indoor, 40 yd. shooting distance, with 18 lanes of shooters. We currently host two youth archery programs, provincial regional events and Fun Shoots in our facility. Having this facility, has contributed to several Canadian National Archery Champions coming out of our club. I would expect the same results from other clubs, providing they have the venues to do so. With the size of the venue that the Sherwood Park Archery Club is proposing, this would be a huge opportunity to expand this sport further and add to the hosting of local and national events. Archery is a sport that can have participants from all ages and backgrounds. It is something that you can do for fun or the competitive aspect. You can set your own goals and targets. With facilities like these, the archery industry will continue to grow and provide more benefits to a larger user base and archery businesses in the area. Thanks

Regards,

Garth Cobb

President

Lloydminster & Area Archers Assoc.

Please accept this input as my support for the plan to remove this reserve. The County is ideally situated to enable the development of the Archery Centre of Excellence (ACE). This one-of-a-kind Canadian facility will benefit County residents and the development of recreational and competitive archers, coaches, judges and event officials at the regional, provincial and national level for years to come. In addition to its many benefits to archery in Canada, the creation of the ACE will also produce a wide range of additional economic benefits for the County as a result of the many opportunities it will create to bring visitors to the County who will stay in various hotels and alternate accommodations as well as spending money on food, gas, and other goods and services while they stay here to participate in or watch provincial, national and international level tournaments and training or development sessions each year.

In addition the archery programs introduced into the school curriculum has had a positive effect on many and this will provide for the future after school

Sincerely
Devon Rogers
Fort Saskatchewan
