**Our Prioritized Strategic Goals**

Goal 1 - Build strong communities to support the diverse needs of residents

Goal 6 - Provide facilities and services that are available and accessible to residents

Goal 7 - Provide opportunities for public engagement and communication

**Report**

Bylaw 28-2020 proposes a new PRM – Public Recreation Major Zoning District to enable the consideration of major recreational facilities that are intended to be used for initiatives on public property. The PRM Zoning District includes a range of uses that would support the development of facilities that are considered Major Public Services in accordance with the

Municipal Development Plan. The PRM Zoning District is not intended to be used within the Heavy Industrial Transition Overlay.

Council has approved an initiative for a multi-purpose agricultural facility (MPAF) to be located within the NE 30-53-22-W4, Pt. NW 30-53-22-W4 and Pt. of SE 31-53-22-W4. The concurrent process to consolidate the subject parcels into one title is being finalized.

The current zoning of the three separate parcels is split between PR – Recreation and AG – Agriculture: General. Although the majority of the uses required to support the MPAF at this location are provided in the current zoning districts, they are separated between the two different zoning districts.

The uses listed within the proposed PRM – Public Recreation Major Zoning District enable consideration for all events and programming that are intended to be provided within the MPAF. Rezoning to the concurrently proposed PRM Zoning District would avoid the area being split zoned and would result in the necessary uses to be contained within one appropriate zoning district.

Further, the current overall height for the main building of the MPAF is higher than the maximum height allowable in the current zoning districts. The proposed PRM Zoning District provides a height maximum that enables the MPAF to achieve the optimal operational height.

Proposed Bylaw 28-2020 also rezones the portion of Point-Aux-Pins Creek that is adjacent to the MPAF to PC – Conservation.
