Brief description of request

The project is to rework the eastern driveway entrance into the cemetery. Over the last many years the slope of the driveway has increased due to roadwork which makes the entrance rather dangerous to drive in. We have obtained one quote to remove existing earth and backfill with clay and 4-6 inches of crushed gravel. In order to obtain a proper slope we need to extend the driveway in width and length

On behalf of Josephburg Community Church, we are requesting that the Office of Elected Officials look at our need for reworking the entrance into the Josephburg Community Church Cemetery. The cemetery was established in 1893. The current driveway entrance into the cemetery was built in roughly 1960 when the cemetery expanded and at this time Township Road 550 was gravel. Over the years Township Road 550 has improved and widened which has caused the slope from Township Road 550 into the cemetery to become very steep and dangerous for anyone entering and exiting the cemetery. Around 2018 the railroad was also lifted causing Township Road 550 to be lifted as well from the entrance. Throughout the past 15 to 18 years, consistory members of Josephburg Community Church have requested assistance through word of mouth to the councillors of area 5. Recently Aaron Nelson suggested that we apply for assistance through Council Priority Funds. If the Elected Officials have any questions at all or require further information, please have them contact me. Thank you for taking the time to consider Josephburg Community Church Cemetery for funding.

Kind Regards,

Stan Thomas
