Recovery (new in 2016)		3 events 129 citizens engaged

Recovery Program

After a fire incident, experience has demonstrated that we have a short window to modify the behaviors of residents impacted either directly or indirectly to avoid a duplication of an unsafe practice.

Activities include providing education to residents in a neighbourhood where a structure fire occurred or an entire community that was threatened by wildfire.

The Recovery Program was conceived in 2016 to educate residents that are directly or indirectly impacted by a fire to change behaviours and contribute to the safety of our residents.

Occupational Health, Safety & Training

	Professional Qualification Courses	Number of Members	Total Hours
On-line training	3	81	3,052
